Skills

- Programming (C++, Python,...)
- HDL (Verilog, Systemverilog,...)
- EDA Tools (Kicad, VS Code,...)
- FPGA Development
- Digital Design
- Self-Learning

Interests

- Traveling
- Sporting
- Watching

Objective

I am a second-year student majoring in Semiconductor Integrated Circuit Design. I have knowledge of digital logic, Verilog/SystemVerilog, and FPGA development gained through classroom learning and self-study projects. I am seeking RTL design internship opportunities at companies to expand my knowledge and practical experience, contribute to the development of advanced chips, and pursue a long-term career in semiconductor design.

Education

Major: Semiconductor IC Design

Sep 2024 - Present

FPT University

GPA: 8.0/10

Academic Projects

Embedded System: ESP32 Microcontroller Mini-Project

Jan 2025- Present

FPT University

- Programmed an ESP32 microcontroller using ArduinoIDE and its core library to interface with various peripherals (UART, I2C, or SPI).
- Designed a compact 2-layer PCB layout using Altium Designer / KiCad, ensuring proper grounding and signal integrity.
- Successfully troubleshooted and debugged hardware communication issues using an oscilloscope/logic analyzer.

RTL Design for 3x3 Image Convolution Architecture

May 2026-Present

FPT University

- Designed a hardware accelerator in **Verilog/VHDL** to execute **3x3 image processing convolution** in real-time.
- Implemented **line buffers** and **window buffers** to efficiently stream pixel data and sustain the 3x3 matrix calculation.
- Optimized the arithmetic logic unit (ALU) using pipelining techniques to achieve high-throughput pixel processing.
- Simulating the design using **ModelSim / Vivado**, analyzing waveforms to verify timing constraints and logic correctness.

Activities

Active Member

June 2026-July 2026

"**Mot cây xanh - Mot hy vọng**" Environmental Project

- Co-organized the "**Trash to Treasure**" green event aimed at raising environmental awareness among university students.
- Managed logistics, set up event booths, and facilitated the exchange process of recyclable waste for green plants (succulents).
- Supported public relations and directly engaged with over 300+ students to spread messages about waste sorting and sustainability.
- Developed strong communication, teamwork, and problem-solving skills under a fast-paced event environment.
